Airbnb Cereal Arabic is a typeface optimised for text and UI settings. Therefore, it can be used in display contexts, at large body sizes but also in contexts where smaller body sizes is required. On low-resolution screens, however, typesetting below 12 points should be avoided to preserve the legibility of the font. Airbnb Cereal Arabic has a character set which includes standard ligatures and Arabic specific punctuation marks. It covers the following languages:

Arabic (including Maghrebi Arabic), Persian and Urdu.
